Self-Contained Emergency Light HSL-SCEL-01

Standards & Approvals

Technical data

- ✦ 50,000 hour life LED light source.
- ✦ Fully meets EN1838 and EN 60598-2-22.
- ✦ Auto self test.
- ✦ Audible and visual fault indication.(Sound Alarm and the flashing of the LED indicator).
- ✦ This fitting incorporates self test technology to automatically carry out regular testing of the Complete fitting, which saves effort and cost by avoiding the need to manually carry out the Mandatory testing of emergency luminaires luminaires.
- ✦ Suitable for: luxury offices, hospitals, restaurants and theaters.
- ✦ Connecting terminals 4 x 2,5 mm² for double assignment.

► Technical specifications

Model	HSL-SCEL-01-25m	HSL-SCEL-01-32m
Case material	Metal	
Case color	White(RAL9003)	
Panel material	Acrylic glass	
Mains voltage	230VAC,50HZ 230VAC/DC Central battery *	
Wattage (AC)	4.5w	5.5w
Charging time	24 hrs	
Viewing distance	EN/DIN-25m	EN/DIN-32m/40m
Emergency duration	1-3 hrs	
SMD LED	12LEDs	15LEDs
Protection type	IP 20 / Class I	
Battery	NI-CD 4.8V 0.8 AH	NI-CD 4.8V 1.0 AH
Permissible temp	0°c - 45°c	

► Legal Basis and Requirements

Self-contained Emergency light for universal mounting according to DIN EN 60598-1, DIN EN 60598-2-22 and EN 1838 for the marking of escape and rescue routes. For single or double sided labeling.

► Safety instructions

CAUTION: Work on the 230 V power system must be carried out by authorised personnel only with due regard to the applicable installation regulations. Switch off the power supply before installing the system.

► Test button Description

Test button	Green LED	Status mode
Not pressed	ON	Battery OK, Mains Operation, No fault, Charging
Pressed approx 1 sec	OFF	5 sec short-term emergency operation
Pressed approx 3 sec	Blinking	Function test, 30 sec. Emergency operation
Pressed approx 5 sec	Flashing	3 h long-term operating test
Pressed again approx 5 sec		Long-term operating test aborted

► Automatic test system

On emergency lights with automatic auto-testing, the electronics and bulb's operational readiness is checked automatically, as is the battery charging process.

20 h after applying mains voltage a function test is automatically run (items checked: switching and bulb, 30 sec. test).

After a further 4 h, an automatic 2 h long-term operating test is run. If you press the test button for 5 sec. before the long-term operating test has ended, the long-term 2 h operating test is aborted.

Following the first long-term operating test, regardless of whether or not this was passed, the weekly cycle (function test of switching and bulb) and yearly cycle (long-term 2 h operating test) are automatically started.

► Meaning of the indicator LED

HS LIGHTS save energy & protect environment		HSL-SCEL-01	
	Mains operation No fault		Operation duration Test failed
	Blinking Function test		Blinking Lamp/changeover fault
	Flashing Operation duration test		Flashing Battery/charging fault
	Mains failure+Emergency light operation		

The status display can only be cleared after the fault has been rectified, mains voltage has been Reapplied and a function test has been run.

Viewing Distance Information

The relationship between the size of the sign and viewing distance to an observer is dened by EN 1838 and DIN 4844 . For a given legend height the maximum viewing distance is calculated by the formula:
 $D_{max} = h \times 200m$ (for internal illuminated signs)

D = viewing distance
 H = pictogram legend height

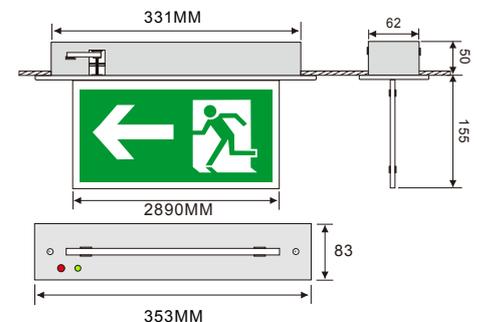

Legend size Width x Drop (millimetres)	Viewing Distance (metres)
250 x 125mm	25m
320 x 160mm	32m
320 x 200mm	40m

► Customize colors

Technical data

HSL-CLEL-01 Versatile emergency luminaire made of high quality plastic housing . Equipped with high performance LED's designed with special optics for illumination of escape and rescue routes. The terminals are designed for through wiring up to 2.5 mm². The lamp is suitable for recessed ceiling mounting . Conforming to the requirement of EN 1838, EN 60598-2-22 and EN62034 . This lamp is available for group / central battery systems as well as emergency lighting.

The model we now offers a cc of 14,2 m with corridor lens and 9,2 m for open area. In both cases with a mounting height of 3m.

Emergency lighting for perfect light distribution especially designed for a corridor applications.

Source LED (low power consumption and long life of approximately 50,000 hours Led)

Self test technology to automatically carry out regular testing of the Complete fitting, which saves effort and cost by avoiding the need to manually carry out the Mandatory testing of emergency luminaires.

► Technical specifications

	HSL-CLEL-01-A1	HSL-CLEL-01-A2
Model	E4-628 01	E4-628 02
Surface Materials	Metal, Aluminum, ABS 94 V0	
Case color	Silver(RAL9006) / RAL9003 (white)	
Mains voltage	230VAC,50HZ or 230VAC/DC Central battery	
Wattage (AC)	6VA	
Charging time	24 hrs	
Emitter luminous flux	240 lm	
Emergency duration	3 hours	
Power LED	2 x 1W	
Protection type	IP 20 / Class I	
Battery Pack	Ni-MH/Ni-CD	
Permissible temp	-0° up to +40°C	
Weight	1,0kg	1,3kg

► Legal Basis and Requirements

Self-contained Emergency lighting for universal mounting according to DIN EN 60598-1, DIN EN 60598-2-22 and EN 1838 for the marking of escape and rescue routes. For single or double sided labeling.

► Safety instructions

CAUTION: Work on the 230 V power system must be carried out by authorised personnel only with due regard to the applicable installation regulations. Switch off the power supply before installing the system.
